FOR MONEY ORDER

Banks Disapprove of the Plan of Paying Interest.

FIDELITY INSURANCE

That Proposition Raised an **Animated Discussion**

San Francisco, Oct. 21.-At the meeting of the American Bankers' association today a resolution favoring a money order system for banks was approved. The proctice of paying interest on dully balances was not commended. When the executive committee's report was read a resolution favoring the increase of dues to add \$35,000 to the income of the association was adopted.

The report of the current committee

was then read. The report of the committee on fidelity insurance provoked a very lively discussion. The committee favored a plan whereby the association should bond its own employes and offered an amendment to the constitution creating the American Bankers' Guaranty Fund, controlled by a board of five trustees to be appointed by the executive council. The committee declared that under the proposed plan members would be furnished indemnity, amply secured by a trust fund, and be given better protection than they now have, at a rate not exceeding one third of the average rates now paid.

This report was made in opposition to the report of the executive council, and the debate that followed was prolonged. Those opposed to the proposed constitutional amendment argued that the matter should go over for another year, for further consideration. The motion to refer the proposed mendment to the executive committee was lost, 152 to 189. A vote was then taken on the constitutional Los Angeles extended an invitation to a sore heart to the inevitable.
